## SUMMARY

---

As a seasoned 6th semester informatics student, I'm practically living and breathing computer science and information systems at this point. These past few semesters have been a whirlwind of lectures on programming languages, algorithm design, software development. It's definitely challenging, but seeing complex concepts come together to create something functional is incredibly rewarding.

## EXPERIENCE

---

### PT. FAJAR SURYA PERKASA – Jakarta, Indonesia

*Graphic Designer-Intern (January 2020 – March 2020)*

- Design poster about warning and information for condominium residents using Adobe Photoshop
- Input condominium residents information data using Microsoft Excel
- Review and apply appropriate locations for pasting posters

### INFORMATION ENGINEERING STUDENT ASSOCIATION – Tangerang, Indonesia

*Multimedia-Members of the community (January 2023 – September 2023)*
